

The Shared Vision for Science at Cambo First School

Incorporates the partnership ethos of:

'What does a Morpeth Scientist look like

At Cambo we believe that we are all Scientists; in our school, across the Morpeth Partnership and in life itself. Our goal is to support our children as learners in the 21st Century with a curiosity to acquire deep, personalised learning through inquiry- based approaches to science. We want our children to have an extensive grasp of scientific vocabulary;
and to be able to use this effectively.
